

We pay a fee for the services offered by XM Radio. I am thankful they have the weather and traffic for the cities I often drive in. One set of stations to remember coast to coast. No fiddling with the radio dial means safer drivers which means less accidents.

I respectfully urge you to reject the National Association of Broadcasters petition 04-160. The NAB members need to learn how to compete against a much better service instead of learning how to buy legislation to quash competition.
